SUMMARY

A professional with a strong passion for coding, testing, and design, with extensive experience in working collaboratively as part of a remote team with minimal supervision. I am actively seeking opportunities with forward-thinking and dynamic organizations that prioritize growth and development, enabling me to continually advance and excel in my career.

EXPERIENCE

MICROVERSE, *Remote*
Mentor (Volunteer Code Review), May 2022 – January 2023

- Mentor junior web developers, providing technical support through code reviews.
    - Received positive feedback from mentees, leading to their improved coding skills and ability to contribute effectively to team projects.
- Collaborates with team members to identify and fix a critical bug in a web application, improving system stability.
    - Successfully proposed and implemented improvements to code organization resulting in increased code quality and overall performance, leading to a 20% reduction in load time for the website/application.

Xoommit Coder House, Netherland, *Remote*
Frontend developer Intern, **July 2022 - January 2023**

- Collaborated with other developers to implement businesses that share our passion for minimalism and simplicity.
    - Successfully collaborated with a team of developers to deliver high-quality and user-friendly software solutions for multiple clients who valued minimalism and simplicity as core design principles. This resulted in positive feedback from clients and increased customer satisfaction.
- Collaborated with the development team of 3 to create the best project Management Software Platform that aims to solve project management software problems from the roots.
    - Played a key role in the development of a project management software platform that received positive feedback from clients and stakeholders, with particular emphasis on its effectiveness in addressing long-standing issues in project management software.

EDUCATION

MICROVERSE, May 2022 – January 2023
Full-Stack Remote Web Development Program, Full Time

- Spent 1300+ hours mastering algorithms, data structures, and full-stack development while simultaneously developing projects with Ruby, Rails, JavaScript, React, and Redux.
- Developed skills in remote pair programming using GitHub, industry-standard git-flow, and daily standups to communicate and collaborate with international remote developers.
